

PIONEERING PERFORMANCE

WITH MICROHYDRIN™ AND PERFORMAX™

YOU CAN NOW ACHIEVE WHAT YOU NEVER DREAMED POSSIBLE.

Microhydrin™'s revolutionary properties stimulates the source of energy, hydrates cells, helps to better absorb essential nutrients and reduces lactic acid build up during exercise. It is the most potent source of free-radical fighting electrons available, and does not become a free radical itself. This makes it an antioxidant second to none.

Scavenges free radicals

Increases hydration of the body

Balances the body's pH

Stimulates the source of energy

Reduces lactic acid during exercise

Increases the absorption of nutrients from foods and supplements

Performax™ assists in oxygen utilization and ATP production, more energy at cellular level, more stamina and endurance. It significantly increases VO₂ Max, improving athletic performance and also minimizes the recovery period after serious training or competition.

Increases stamina

Helps to increase ATP

Minimises recovery period

Helps to improve athletic performance

Increases VO₂ Max

THE WINNING COMBINATION!
